- Google Developer Student Club

JERIC MATTHEW LAZARO

EXPERIENCE

iRCITE 2024

International research conference on Information technology education

- Developed mobile applications using Flutter Flow for IRCite projects, contributing to the club's mission of fostering technological innovation.
- Collaborated with team members to translate design mockups into interactive and responsive user interfaces.
- Conducted code reviews and provided feedback to ensure code quality and adherence to best practices.
- Actively participated in brainstorming sessions and contributed ideas for improving user experience and functionality.
- Assisted in organizing workshops and training sessions to share knowledge and skills with other club members.
